

HOW IT WORKS

Listen to a scenario with our pre-recorded actors reading the script – this will give you the idea of the scenario.

> Then download the voiceless soundtrack.

> Play it out of your computer or stereo whilst acting along reading the script and leaving a personal greeting on your mobile answerphone/voicemail.

> Your family and friends will be fooled into thinking that you really are stuck in the weirdest situations.

Ha>>ha

The Mobile Messages Team

.....

Your Script:

2) Helicopter Crash

Tip: After saying "Brecon Beacons" shout in a panicked voice, when you shout, move the phone away from your mouth.

01 second: "Hello.., I'm in a helicopter, in Wales, flying over the Brecon Beacons... You're gonna hit that, gonna hit that, gonna crash!"

14 seconds: "We've just crashed, I think I'm alright but the pilot's not".

17 seconds: "Wohhhhh".

19 seconds: "We're rolling down the mountain.

21 seconds: "AHhhhhhhhhhhhhhhhh"

23 seconds: "Wohhhhh"

25 seconds: "ohhhhhhhhhhh"

.....

Tips:

We recommend that you **distance yourself** about 2 feet from the speakers, but try experimenting with different distances and different volume levels to get the best maximum reality results.

Try and stick to the timings for each line you have to read as there are sound effects that are recorded at specific times. If you don't get it right the first time try again until its perfect.

Remember once you've paid your £1 you can have endless tries it doesn't cost any more!!...And its fun!!!
