

HOW IT WORKS

Listen to a scenario with our pre-recorded actors reading the script – this will give you the idea of the scenario.

- > Then download the voiceless soundtrack.
- > Play it out of your computer or stereo whilst acting along reading the script and leaving a personal greeting on your mobile answerphone/voicemail.
- > Your family and friends will be fooled into thinking that you really are stuck in the weirdest situations.

Ha>>ha

The Mobile Messages Team

.....

Your Script:

16) Robbery

Tip: Whisper until 26 seconds as though you don't want the robber to hear you and on the last line struggle to speak as if you were wrestling.

02 seconds: "Hello, there's a robbery taking place"

15 seconds: "Ahh he shot him."

19 seconds: "I'm in the library, fictional section."

26 seconds: "Don't point that at me"

30 seconds: "Not so hard now are you. Didn't you know libraries are supposed to be quiet places"

.....

Tips:

We recommend that you **distance yourself** about 2 feet from the speakers, but try experimenting with different distances and different volume levels to get the best maximum reality results.

Try and stick to the timings for each line you have to read as there are sound effects that are recorded at specific times. If you don't get it right the first time try again until its perfect.

Remember once you've paid your £1 you can have endless tries it doesn't cost any more!!...And its fun!!!
